QUALIFY FOR THE FUTURE WORLD KIA NOHO TAKATŪ KI TŌ ĀMUA AO!

Level 1 Geography 2021

91007 Demonstrate geographic understanding of environments that have been shaped by extreme natural event(s)

Credits: Four

Achievement	Achievement with Merit	Achievement with Excellence
Demonstrate geographic understanding of environments that have been shaped by extreme natural event(s).	Demonstrate in-depth geographic understanding of environments that have been shaped by extreme natural event(s).	Demonstrate comprehensive geographic understanding of environments that have been shaped by extreme natural event(s).

Check that the National Student Number (NSN) on your admission slip is the same as the number at the top of this page.

You should attempt ALL the questions in this booklet.

If you need more room for any answer, use the extra space provided at the back of this booklet.

Check that this booklet has pages 2–8 in the correct order and that none of these pages is blank.

Do not write in any cross-hatched area (
(
). This area may be cut off when the booklet is marked.

YOU MUST HAND THIS BOOKLET TO THE SUPERVISOR AT THE END OF THE EXAMINATION.

INSTRUCTIONS

Name ONE type of **extreme natural event** and an **environment case study** (or studies) in which it has occurred that you will use to answer ALL parts of the question in this booklet.

Extreme natural event:	
Environment case study (or studies):	

Geographic concepts you may use in your answers include:

Processes

A sequence of actions that shape and change environments.

Environments

May be natural and/or cultural. They have particular characteristics and features, which can be the result of natural and/or cultural processes.

Change

Involves any alteration to the natural or cultural environment. Change can be spatial and/or temporal. It occurs at varying rates, at different times, and in different places.

Interaction

Involves elements of an environment affecting each other and being linked together. Interaction incorporates movement, flows, connections, links, and interrelationships, which work together and may be one- or two-way interactions. Landscapes are the visible outcome of interactions. Interaction can bring about environmental change.

Sustainability

Involves adopting ways of thinking and behaving that allow people to meet their needs and aspirations without preventing future generations from meeting theirs. It may be achieved by preventing, limiting, minimising, or correcting environmental damage to water, air, and soil, as well as considering problems related to waste, noise, and visual pollution.

In the space provided below, draw an annotated diagram(s) to explain the sequence of actions that produced the extreme natural event in your chosen environment case study (or studies).

1	(a))	Pr	ന	ess	es
۱	u	,		\mathbf{v}	C 30	, 5

 	d detailed supp	

The cultural environment can include:

- buildings
- the economy
- farms
- infrastructure
- · people.

Choose ONE effect that your chosen extreme natural event had on the cultural environment in your case study (or studies). **Use this effect to answer both (b) and (c).**

Ch	osen effect:
)	Effect
	Explain this effect on the cultural environment in your case study (or studies).
	In your answer, include geographic terminology, a geographic concept from page 2, and detailed supporting evidence.

(c) Response

People who respond to extreme natural events can include:

- individuals
- groups
- organisations
- governments.

In your answer, include geographic terminology, a geographic concept from page 2, and detailed supporting evidence.

Extra space if required. Write the question number(s) if applicable.

QUESTION	write the question number(s) if applicable.
