Name: NSN School Code	

DAY 2 THURSDAY

QUALIFY FOR THE FUTURE WORLD KIA NOHO TAKATŪ KI TŌ ĀMUA AO!

COMMON ASSESSMENT TASK

SUPERVISOR'S USE ONLY

Level 1 Mathematics and Statistics, 2019 91027 Apply algebraic procedures in solving problems

Thursday 19 September 2019 Credits: Four

You should attempt ALL the questions in this booklet.

Calculators may NOT be used.

Show ALL working.

If you need more space for any answer, use the page(s) provided at the back of this booklet and clearly number the question.

You are required to show algebraic working in this paper. 'Guess and check' and 'correct answer only' methods do not demonstrate relational thinking and will limit the grade for that part of the question to a maximum of Achievement. 'Guess and check' and 'correct answer only' may only be used a maximum of one time in the paper and will not be used as evidence of solving a problem.

A candidate cannot gain Achievement in this standard without solving at least one problem.

Answers must be given in their simplest algebraic form.

Where a question is given in words you will be expected to write an equation.

Check that this booklet has pages 2–8 in the correct order and that none of these pages is blank.

YOU MUST HAND THIS BOOKLET TO THE SUPERVISOR AT THE END OF THE EXAMINATION.

ASSESSOR'S USE ONLY		
Achievement	Achievement with Merit	Achievement with Excellence
Apply algebraic procedures in solving problems.	Apply algebraic procedures, using relational thinking, in solving problems.	Apply algebraic procedures, using extended abstract thinking, in solving problems.
	Over	all level of performance

QUESTION ONE

ASSESSOR'S USE ONLY

He says, "When 60 is divided by my age and then 12 is added to this a	.1
result of 14."	s answer, this gives a

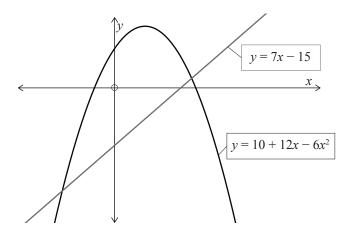

What is Marcus's age?

(b)	Solve the inequality $6(2-4y) + 4(6y-2) < 4(y+4)$.
(0)	Solve the inequality $0(2 + y) + 4(0y + 2) + 4(y + 4)$.

()	6.1.41.4:	y+8	<i>y</i> + 6
(c)	Solve the equation	y+2	y+3.

(d) The diagram below shows a sketch of part of the graph $y = 10 + 12x - 6x^2$. Temera draws another line onto this graph with equation y = 7x - 15.

Find the *x*-values of the two points where the two graphs intersect each other.

(e) The equation of the straight line passing through the points (3, -3) and (7, -8) is given by hy = gx + 3.

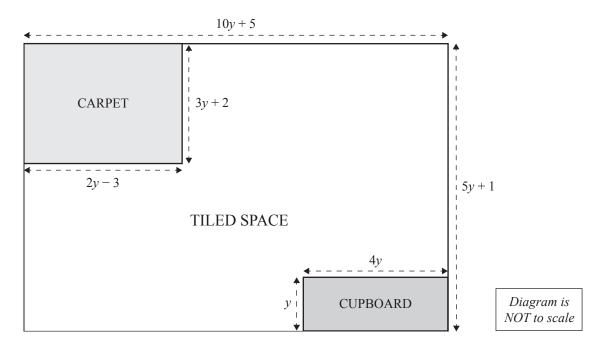

Using algebraic methods, find the values of the numbers g and h.

QUESTION TWO

ASSESSOR'S USE ONLY

Solve the equation $15y^2 - 4y - 4 = 0$ Find the values of y if $25 \times 5^{2y+13} = 5y^2$					
	Solve	he equation $15y^2 - 4$	4y - 4 = 0		
Find the values of y if $25 \times 5^{2y+13} = 5^{y^2}$					
Find the values of y if $25 \times 5^{2y+13} = 5y^2$					
Find the values of y if $25 \times 5^{2y+13} = 5^{y^2}$					
Find the values of y if $25 \times 5^{2y+13} = 5y^2$					
Find the values of y if $25 \times 5^{2y+13} = 5y^3$					
Find the values of y if $25 \times 5^{2y+13} = 5^{y^2}$					
Find the values of y if $25 \times 5^{2y+13} = 5^{y^2}$					
Find the values of y if $25 \times 5^{2y+13} = 5^{y^2}$					
	Find tl	e values of v if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find tl	e values of y if $25 \times$	$5^{2y+13} = 5^{y^2}$		
	Find tl	e values of y if $25 \times$	$5^{2y+13} = 5^{y^2}$		
	Find tl	e values of y if $25 \times$	$5^{2y+13} = 5^{y^2}$		
	Find tl	e values of y if $25 \times$	$(5^{2y+13} = 5^{y^2})$		
	Find tl	e values of y if $25 \times$	$(5^{2y+13} = 5^{y^2})$		
	Find tl	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find tl	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find tl	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find the	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find tl	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find the	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find the	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find the	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find the	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		
	Find the	e values of y if 25×	$(5^{2y+13} = 5^{y^2})$		

(d) The plan of a rectangular classroom space is shown in the diagram below.

(i)	If the perimeter of the TILED SPACE is 192 metres, then find the value of y
	Note the tiled space does not include the shaded carnet or curboard

If T	$T = y^2 + y + 1$, find an expression for the area of the TILED SPA	ACE, in terms of T.

(a)	(i)	$g = de^2 - 2t$

Give the equation for d in terms of e, f, and g.

Give the equation for z in terms of w, x, y, and j.

(b) Simplify, as far as possible, $\frac{5y^2 - 25y}{y^2 - 25}$.

ASSESSOR'S
AUGEOUCK O
1105 01111
LISE ONLY

(c) Write $\frac{10y-2}{5} + \frac{4y-5}{4}$ as a simplified single fraction.

(d) Find the value of w so that the area of the right-angled triangle has the same value as the area of the rectangle, shown below.

All lengths are in cm. Note: Area of a Triangle = $\frac{1}{2}$ × base × height.

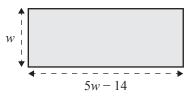

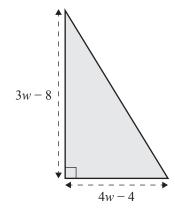

Diagram is NOT to scale

ASSESSOR'S USE ONLY

QUESTION NUMBER	Extra space if required. Write the question number(s) if applicable.
